\*Read instruction manual carefully, before using the power supply unit.

=NOTES=

\*1. At 100VAC/200VAC, Ta=25°C, nominal output voltage and maximum output power.

\*2. For cases where conformance to various safety specs (UL, CSA, EN) are required, to be described as 100 - 240VAC(50 - 60Hz).

\*3. Not applicable for the inrush current to Noise Filter for less than 0.2ms.

\*4. Measure with JEITA RC-9131B probe, Bandwidth of scope :100MHz.

\*5. 85 - 265VAC, constant load.

- \*6. No load-Full load, constant input voltage.
- \*7. Constant current limit and Hiccup with automatic recovery. Avoid to operate at over load or short circuit condition.

\*8. OVP circuit will shut down output, manual reset (Re power on).

\*9. Measured by the each measuring method of UL, CSA, EN and Den-an (at 60Hz), Ta=25°C.

\*10. Output Derating

- Derating at standard mounting. Refer to OUTPUT DERATING CURVE (A258-01-02/HD-\_).
- Load (%) is percent of maximum output power or maximum output current, do not exceed its derating of maximum load. - For conditions of start up at -40°C to -10°C, refer to derating curve (A258-01-03/HD-\_).
- \*11. Category 4 exposure levels : Track transportation over U.S. highways, Composite two-wheeled trailer.

\*12. The power supply is considered a component which will be installed into a final equipment.

The final equipment should be re-evaluated that it meets EMC directives.

### OUTPUT DERATING

A258-01-02/HD

| Ta (°C)   | LOAD (%)   | LOAD (%)   | LOAD (%)      |
|-----------|------------|------------|---------------|
| 1a(C)     | MOUNTING A | MOUNTING B | MOUNTING C, D |
| -10 - +40 | 100        | 100        | 100           |
| 50        | 100        | 80         | 80            |
| 60        | 65         | 60         | 60            |
| 71        | 30         | 30         | 20            |

| MOUNTING A<br>(STANDARD MOUNTING) | MOUNTING B | MOUNTING C | MOUNTING D | DON'T USE |
|-----------------------------------|------------|------------|------------|-----------|
|                                   |            |            |            |           |
|                                   |            |            |            |           |

## HWS100A/HD

### DERATING TO START UP AT Ta : -40 to -10°C

A258-01-03/HD

| Input Voltage :             | LOAD (%)         |  |  |  |
|-----------------------------|------------------|--|--|--|
| Vin (VAC)                   | Normal start up. | Stable output after 1 min from start up. |  |  |
| $85 \le Vin \le 90$         | 90               | 100                                      |  |  |
| $90 \le \text{Vin} \le 265$ | 100              | 100                                      |  |  |

=NOTES=

\*At Ta : -40 to -10°C.

\*Input voltage : Not gradual start up. \*Do not use the load that is constant current mode.

\*Avoid forced air cooling. It is assumed that inside of power supply is heated by self-heating within 1 minutes. \*No condensing.

\*Pay attention to above items before using the unit. Incorrect usage could lead to unstable output voltage.
