|-------|--|------------|--|------------------|------------------|------------------|------------------|-----|
| 1     | Nominal Output Voltage                   | V          | 5  | 12               | 15               | 24               | 48               |     |
| 2     | Maximum Output Current                   | A          | 10   | 4.3              | 3.5              | 2.2              | 1.1              |     |
| 3     | Maximum Output Power                     | W          | 50.0   | 51.6             | 52.5             | 52.8             | 52.8             |     |
| 4     | Efficiency (Typ.) (*1)                   | 100VAC     | %  | 82               | 83               | 83               | 84               | 84  |
|       |  | 200VAC     | %  | 84               | 85               | 86               | 87               | 86  |
| 5     | Input Voltage Range (*2)                 | -          | 85 - 265VAC (47 - 63Hz) or 120 - 370VDC  |                  |                  |                  |                  |     |
| 6     | Input Current (Typ.) (*1)                | A          | 0.65/0.35  |                  |                  |                  |                  |     |
| 7     | Inrush Current (Typ.) (*1)(*3)           | -          | 14A at 100VAC, 28A at 200VAC, Ta=25°C, Cold Start  |                  |                  |                  |                  |     |
| 8     | PFHC                                     | -          | Designed to meet IEC61000-3-2  |                  |                  |                  |                  |     |
| 9     | Voltage Fluctuations / Flicker Emissions | -          | Designed to meet IEC61000-3-3  |                  |                  |                  |                  |     |
| 10    | Power Factor (Typ.) (*1)                 | -          | 0.97/0.91  |                  |                  |                  |                  |     |
| 11    | Output Voltage Range                     | V          | 4.0 - 6.0  | 9.6 - 14.4       | 12.0 - 18.0      | 19.2 - 28.8      | 38.4 - 52.8      |     |
| 12    | Maximum Ripple & Noise (*4)              | 0≤Ta≤70°C  | mV   | 120              | 150              | 150              | 150              | 200 |
|       |  | -10≤Ta<0°C | mV   | 160              | 180              | 180              | 180              | 240 |
| 13    | Maximum Line Regulation (*5)             | mV         | 20   | 48               | 60               | 96               | 192              |     |
| 14    | Maximum Load Regulation (*6)             | mV         | 40   | 96               | 120              | 150              | 240              |     |
| 15    | Temperature Coefficient                  | -          | Less than 0.02% / °C   |                  |                  |                  |                  |     |
| 16    | Over Current Protection (*7)             | A          | 10.5 ≤   | 4.51 ≤           | 3.67 ≤           | 2.31 ≤           | 1.15 ≤           |     |
| 17    | Over Voltage Protection (*8)             | V          | 6.25 - 7.25  | 15.0 - 17.4      | 18.8 - 21.8      | 30.0 - 34.8      | 55.2 - 64.8      |     |
| 18    | Hold-up Time (Typ.) (*1)                 | -          | 20ms   |                  |                  |                  |                  |     |
| 19    | Leakage Current (*9)                     | -          | Less than 0.5mA. 0.2mA (Typ) at 100VAC / 0.4mA (Typ) at 230VAC                                   |                  |                  |                  |                  |     |
| 20    | Remote Sensing                           | -          | -  |                  |                  |                  |                  |     |
| 21    | Parallel Operation                       | -          | -  |                  |                  |                  |                  |     |
| 22    | Series Operation                         | -          | Possible   |                  |                  |                  |                  |     |
| 23    | Operating Temperature (*10)              | -          | -10 to +70°C (-10 to +50°C:100%, +60°C:70%, +70°C:40%)   |                  |                  |                  |                  |     |
| 24    | Operating Humidity                       | -          | 30 to 90%RH (No Condensing)  |                  |                  |                  |                  |     |
| 25    | Storage Temperature                      | -          | -30 to +85°C   |                  |                  |                  |                  |     |
| 26    | Storage Humidity                         | -          | 10 to 95%RH (No Condensing)  |                  |                  |                  |                  |     |
| 27    | Cooling                                  | -          | Convection Cooling   |                  |                  |                  |                  |     |
| 28    | Withstand Voltage                        | -          | Input - FG : 2kVAC (20mA), Input - Output : 3kVAC (20mA)<br>Output - FG : 500VAC (20mA) for 1min |                  |                  |                  |                  |     |
| 29    | Isolation Resistance                     | -          | More than 100MΩ at 25°C and 70%RH Output - FG : 500VDC   |                  |                  |                  |                  |     |
| 30    | Vibration                                | -          | At no operating, 10 - 55Hz (Sweep for 1min)<br>19.6m/s <sup>2</sup> Constant, X,Y,Z 1hour each.  |                  |                  |                  |                  |     |
| 31    | Shock                                    | -          | Less than 196.1m/s <sup>2</sup>  |                  |                  |                  |                  |     |
| 32    | Safety (*11)                             | -          | Approved by ES60601-1, EN60601-1, CSA-C22.2 No.60601-1   |                  |                  |                  |                  |     |
| 33    | Line DIP                                 | -          | Designed to meet SEMI-F47 (200VAC Line only)   |                  |                  |                  |                  |     |
| 34    | Conducted Emission (*12)                 | -          | Designed to meet EN55011/EN55022-B, FCC-B, VCCI-B  |                  |                  |                  |                  |     |
| 35    | Radiated Emission (*12)                  | -          | Designed to meet EN55011/EN55022-B, FCC-B, VCCI-B  |                  |                  |                  |                  |     |
| 36    | Immunity (*12)                           | -          | Designed to meet IEC61000-6-2 IEC61000-4-2, -3, -4, -5, -6, -8, -11                              |                  |                  |                  |                  |     |
| 37    | Weight (Typ.)                            | -          | 260g   |                  |                  |                  |                  |     |
| 38    | Size (W x H x D)                         | mm         | 26.5 x 82 x 120 ( Refer to Outline Drawing )   |                  |                  |                  |                  |     |

\*Read instruction manual carefully, before using the power supply unit.

=NOTES=

- \*1. At 100VAC/200VAC, Ta=25°C, nominal output voltage and maximum output power.
- \*2. For cases where conformance to various safety specs (ES, CSA, EN) are required, to be described as 100 - 240VAC(50 - 60Hz).
- \*3. Not applicable for the inrush current to Noise Filter for less than 0.2ms.
- \*4. Measure with JEITA RC-9131B probe, Bandwidth of scope :100MHz.
- \*5. 85 - 265VAC, constant load.
- \*6. No load-Full load, constant input voltage.
- \*7. Hiccup with automatic recovery. Avoid to operate at over load or short circuit condition.
- \*8. OVP circuit will shut down output, manual reset (Re power on).
- \*9. Measured by the each measuring method of ES, CSA and EN (at 60Hz).
- \*10. Output Derating
  - Derating at standard mounting. Refer to OUTPUT DERATING CURVE (A257-01-02\_).
  - Load (%) is percent of maximum output power or maximum output current, do not exceed its derating of maximum load.
- \*11. As for ES60601-1, EN60601-1 and CSA-C22.2 No.60601-1, 3rd Edition and MOOP level.
- \*12. The power supply is considered a component which will be installed into a final equipment.  
The final equipment should be re-evaluated that it meets EMC directives.
