| 30    | Vibration  | _   | At no operating, 10 - 55Hz (Sweep for 1min)                         |             |             |             |             |
|       |  |     | 19.6m/s <sup>2</sup> Constant, X,Y,Z 1hour each.                    |             |             |             |             |
| 31    | Shock  | -   | Less than 196.1m/s <sup>2</sup>                                     |             |             |             |             |
| 32    | Safety (*11  | ) - | Approved by ES60601-1, EN60601-1, CSA-C22.2 No.60601-1              |             |             |             |             |
| 33    | Line DIP   | -   | Designed to meet SEMI-F47 (200VAC Line only)                        |             |             |             |             |
| 34    | Conducted Emission (*12                                  |     | Designed to meet EN55011/EN55022-B, FCC-B, VCCI-B                   |             |             |             |             |
| 35    | Radiated Emission (*12                                   |     | Designed to meet EN55011/EN55022-B, FCC-B, VCCI-B                   |             |             |             |             |
|       | Immunity (*12  | ) - | Designed to meet IEC61000-6-2 IEC61000-4-2, -3, -4, -5, -6, -8, -11 |             |             |             |             |
|       | Weight (Typ.)  | -   |   |             |             |             |             |
|       |  |     |   |             |             |             |             |
|       |  |     |   |             |             |             |             |

<sup>\*</sup>Read instruction manual carefully, before using the power supply unit.

## =NOTES=

- \*1. At 100VAC/200VAC, Ta=25°C, nominal output voltage and maximum output power.
- \*2. For cases where conformance to various safety specs (ES, CSA, EN) are required, to be described as 100 240VAC(50 60Hz).
- \*3. Not applicable for the inrush current to Noise Filter for less than 0.2ms.
- \*4. Measure with JEITA RC-9131B probe, Bandwidth of scope :100MHz.
- \*5. 85 265VAC, constant load.
- \*6. No load-Full load, constant input voltage.
- \*7. Hiccup with automatic recovery. Avoid to operate at over load or short circuit condition.
- \*8. OVP circuit will shut down output, manual reset (Re power on).
- \*9. Measured by the each measuring method of ES, CSA and EN (at 60Hz).
- \*10. Output Derating
  - Derating at standard mounting. Refer to OUTPUT DERATING CURVE (A257-01-02/A- ).
  - Load (%) is percent of maximum output power or maximum output current, do not exceed its derating of maximum load.
- \*11. As for ES60601-1, EN60601-1 and CSA-C22.2 No.60601-1, 3rd Edition and MOOP level.
- \*12. The power supply is considered a component which will be installed into a final equipment.

The final equipment should be re-evaluated that it meets EMC directives.
