= NOTES =

*1. At 12VDC and maximum output power and Ta=+25°C.

*2. This is specified at the output terminals by JEITA RC-9141 measuring method.

*3. From 9.0 ~ 18.0VDC, constant load (balanced load).

*4. From No load - Full load (balanced load), constant input voltage.

*5. Constant current limiting with automatic recovery.

Avoid to operate over load or dead short for longer than 30 sec.

(Refer to instruction manual for details.)

*6. Rating - Refer to derating curve (C197-01-02_).

- Load(%) is percent of maximum output current.
